Proposed Creative Europe project – to which project are you looking for partners?

Sector or field	contemporary visual arts, photography, design and applied arts, exhibitions and curation, arts education, audience development, educational and participatory cultural programmes
Description or summary of the proposed project	The House of Arts Veszprém is interested in joining Creative Europe projects as a co-organiser and, in selected applications, as a project coordinator/leader. We are especially interested in projects supporting contemporary arts, contemporary design and photography, artist mobility and skills, and international knowledge exchange, strengthening professional networks and long-term cultural cooperation. Our contribution combines contemporary art presentation with education and inclusion. We curate and present Hungarian and international contemporary visual arts, with a particular interest in contemporary design and photography projects. We also run hands-on learning programmes, including our fixir digital lab (photography masterclasses and AI training). In addition, we implement community-based formats that bring older local residents into cultural life and artistic participation. As part of Veszprém–Balaton European Capital of Culture 2023, and through recent Erasmus+ collaborations, we gained strong experience in international project delivery and partner networking. Building on this, we aim to actively contribute to future European and cross-border cultural collaborations, particularly in the fields of contemporary art, design and photography.
Partners currently involved in the project	-
