

TFK programme, funded projects 2026

Project title: COoperative UniveRsity Education on Satellite and non-tErrestrial 6G: from Arctic resilience to equatorial connectivity	
Coordinator Oulun yliopisto Konstantin Mikhaylov konstantin.mikhaylov@oulu.fi	The project establishes a long-term educational collaboration between UOULU and Brazilian HEIs to develop degree-level education on non-terrestrial (NTN) and satellite networks in the context of 6G. It addresses a clear skills gap by integrating NTN-focused content into jointly developed contact and virtual courses, hands-on projects and experimental learning supported by the 6GTN test network. The cooperation combines UOULU's 6G expertise and experimental infrastructure with complementary Brazilian academic, public-sector and industry-oriented strengths. Focused on mobility and reinforced by joint teaching and interdisciplinary activities, 6G-COURSE enhances internationalisation, educational quality and relevance, with sustainable institutional practices embedded beyond the project period.
Partners Instituto Federal de Santa Catarina (IFSC) SENAI/SC University Center (UniSENAI)
