

TFK programme, funded projects 2026

Project title: CYber-Security Training & Education for Maritime Systems	
Coordinator Ab Yrkeshögskolan vid Åbo Akademi Victor Bolbot victor.bolbot@novia.fi	The project develops innovative maritime cybersecurity training by combining simulator-based education with cyber-physical system research. It addresses gaps in current training by focusing on resilience, decision-making, and real-world cyber incident scenarios. Through collaboration between Novia University of Applied Sciences (Novia UAS) and Singapore University of Technology and Design (SUTD), it creates joint teaching modules, mobility frameworks, and validated training tools. The outcomes will be embedded in curricula, strengthen international cooperation, and enhance student competencies in global, technology-driven maritime environments.
Partners Singapore University of Technology and Design (SUTD)
