

TFK programme, funded projects 2026

Project title: Enhancing Chemical Training for Biotechnology and Environmental Specialists	
Coordinator Åbo Akademi Johan Werkelin johan.werkelin@abo.fi	This project between Åbo Akademi University (AAU, Finland) and the National University of Water and Environmental Engineering (NUWEE, Ukraine) aims to strengthen the practical and applied training in chemistry for specialists in the fields of biotechnology and environmental science. Special attention will be paid to adopting innovative approaches in chemical education.
Partners National University of Water and Environmental Engineering	These measures are crucial for Ukraine, both for maintaining stability in the educational system during the war and for training specialists who can ensure environmentally safe reconstruction in the post-war period. The project also reinforces the Finnish educational sector's reputation for supporting countries in crisis situations.
