

TFK programme, funded projects 2026

Project title: Future Professionals for Safe & Healthy Construction	
Coordinator Kaakkois-Suomen ammattikorkeakoulu Oy Hanna-Kaisa Koponen hanna-kaisa.koponen@xamk.fi	The FUSECO project strengthens sustainable construction capacity in Ukraine by integrating life-cycle thinking, circularity, and low-carbon solutions into civil engineering education. The project is implemented by South-Eastern Finland University of Applied Sciences (Xamk) together with Lviv Polytechnic National University, co-developing and piloting practice-oriented teaching modules covering sustainable construction, circular materials, reconstruction, and site planning. Through joint teaching, case-based learning, and train-the-trainer exchanges, the project builds long-term teacher competences and embeds new content into existing curricula. Supported by hybrid teaching solutions, the project contributes to sustainable reconstruction and alignment with European standards.
Partners Lviv Polytechnic National University
